

# PolicyStat Integration Factors

## Required Firewall Rules

To support full usage of PolicyStat, your organization's firewall and filtering rules must allow traffic from all the following domains:

- [\\*.algolia.net](https://www.algolia.net)
- [\\*.s3.amazonaws.com](https://s3.amazonaws.com)
- [\\*.cloudfront.net](https://cloudfront.net)
- [\\*.googleapis.com](https://googleapis.com)
- [\\*.newrelic.com](https://newrelic.com)
- [\\*.policystat.com](https://policystat.com)
- [\\*.pstattraining.com](https://pstattraining.com)
- [\\*.rldatix.com](https://rldatix.com)
- [\\*.screencast.com](https://screencast.com)
- [\\*.hotjar.com](https://hotjar.com)
- [ajax.aspnetcdn.com](https://ajax.aspnetcdn.com)
- [api.mixpanel.com](https://api.mixpanel.com)
- [cdn.mxpl.com](https://cdn.mxpl.com)

For more details on required domains, see [What are the Required Firewall Rules for accessing PolicyStat?](#)

## Allow List PolicyStat's Mail Domain / IPs

- [\\*@rldatix.com](mailto:*.rldatix.com)
- [\\*@policystat.com](mailto:*.policystat.com)
- Dedicated Source IP: 198.2.135.49

## PolicyStat IP Addresses for LDAP(S)

If your organization has chosen to integrate your Active Directory, secure LDAP connections from the following six IP addresses must be allowed for synchronization to occur. PolicyStat utilizes a geographically redundant architecture, maintaining connections from two separate servers simultaneously.

Sandboxed/Training environment:

- 174.129.226.255
- 174.129.250.147

Production/Live environment:

- 184.72.224.151
- 184.72.224.167

Beta environment:

- 184.72.236.214
- 184.72.237.166

## Further Integration Options

Your Implementation Consultant can provide further assistance with integration options regarding [VPN Configuration](#), [Active Directory Integration](#), and [Single Sign-On \(SSO\) via SAML 2.0](#)
